

SmartKlub Leeds: Transportation, Alternative Fuel & Air Quality– 29th July 2015.

Background:

This is the structure and methodology for the second co-production session of SmartKlub Leeds following the first SmartKlub Meeting in Leeds, March 2015. Background to SmartKlub can be found at smartklub.org.

Overview

SmartKlub Leeds commenced its work in April 2015 with a kick off and introduction workshop on 22nd April. The write up of this workshop can be found [here](#) & [here](#). It builds on the work of the Leeds Energy Forum which included a number of widely attended group workshops and smaller focus groups.

In simple terms SmartKlub Leeds has been established to work to turn the collective intelligence from the Leeds Energy Forum and the work of SmartKlub Leeds into a project pipeline of energy projects for the City.

Objectives

In simple terms can we shape, together, the short medium & long term opportunities for the city which:

- Save carbon,
- Beat fuel poverty &
- Have a sound business case.

And if they do LCC & its partners will take these forward under the [charter](#) of SmartKlub.

The objectives of this workshop are to use the framework, initiated at the SmartKlub Leeds introduction & kick-off to co-produce initial project plans that

1. Will maximise & leverage the planned investments & funding streams;
2. Identify the wider eco-system, supply chain & partners that can make this happen &
3. Create the conditions to generate the broadest and maximum number of projects for the City.

Details are held on this Eventbrite [link](#), and the report to the LCC executive board can be found [here](#) with background [here](#).

Agenda

Chaired by: Paul Connell - SmartKlub Leeds

Supported by: Tom Knowland, Richard Crowther & Andrew Hickford,
of Leeds City Council.

Timing		
9.15 - 9.30	Arrival & Coffee	Paul Connell, Tom Knowland,
9.15 - 9.30	SmartKlub & LCC	Paul Connell & Tom Knowland
9.30 – 9.45	Introduction to transportation session	Intro by Paul Connell & presentation by Richard Crowther & Andrew Hickford.
9.45 - 11.45	Themed review of Potential Project Opportunities against the SmartKlub Priorities & Charter.	<p>Using the available data, review and challenge the current state & develop an outline plan for development of projects related to transport fuelling infrastructure.</p> <p>Under the headings of</p> <ol style="list-style-type: none">1. Data - <i>what do we know, what do we need to know.</i>2. Technologies, & Products; Opportunities & Risk:3. What does it mean for the City – Economy (Jobs & Growth), Environment (Reduce Carbon Intensity& Air Quality), Community (Quality of Life):4. Procurement, Financing & Business Models: <p><i>Set out a brief and what questions need to be answered so that we can create a programme to give the greatest benefit to the City & its Citizens. What does LCC need to do differently or disruptively to effectively enable alternative fuel use at scale?</i></p>
12.00 - 12.30	Wrap Up, Closure, Review of Suggested Approaches. Next Steps for SK Leeds	Led By Paul C & Tom Knowland
